Anatoly Scherbakov *Curriculum Vitae*

Yerevan, Armenia 🇦🇲 · yeti.sh · **anatoly** 🐶 **yeti.sh** · GitHub · LinkedIn · ORCID · Nanodash

Software engineer building agentic systems, Linked Data infrastructure, and open-source developer tools. W3C Invited Expert and YAML-LD editor.

Professional Experience

Datafold · Y S20 · Software Development Engineer

`since Jan 2022`

Develop graph-based data lineage and dependency analysis, BI integrations, and graph data models for database assets and pipelines. Implement and optimise graph queries across Python and Rust.

Build agentic migration workflows, configure execution constraints and validation feedback, and improve workflow reliability, monitoring and CI/CD.

RecallMasters · Engineering Team Lead

`Dec 2014 – Dec 2021`

California-based automotive safety company.

Built an automation system to process vehicle recall data for staff and clients. Led a team of about 10 developers through growth of the product. Migrated the system from a monolith toward microservices to support that growth.

Used AWS EC2, RDS, Lambda, and SQS for the product's infrastructure.

Vboost · Software Engineer

`Sep 2012 – Dec 2014`

California-based automotive marketing company.

Built a system to produce promotional videos and automate dealership marketing. Formed and mentored a small development team around the product.

Standards & Open Source (see also: Projects)

W3C · Invited Expert @ JSON-LD Working Group

`since Dec 2023`

YAML-LD editor since Feb 2026.

PyLD · Maintainer

`since 2025`

Built the command-line interface and overhauled documentation and document loaders for the Python JSON-LD implementation; ongoing maintenance.

iolanta · Author

`since Jan 2023`

Browse and visualize Linked Data.

sparqld · Author

Built a Rust SPARQL endpoint and Model Context Protocol (MCP) server over RDF files, including JSON-LD and YAML-LD. Keeps the graph updated as files change, exposing read-only queries to AI agents and other SPARQL clients.

jeeves.sh · Author

`since Oct 2021`

Command runner built with Python and Typer; an alternative to GNU Make.

nanopublishing · Author

`since Jan 2026`

Agent skills to craft, validate, and publish nanopublications from Markdown-LD.

Teaching

KGC|Learn · Teaching Assistant

`since 2026`

Continuing Education Team.

Education

TUSUR · Specialist — Applied Computer Science & Economics

`Jun 2007 – Jun 2013`

Tomsk State University of Control Systems and Radioelectronics. Thesis: *Discrete Event Simulation of Business Processes*.

Additional Education

KGC|Learn · KG Builder

`2026`

Builder certificate from The Knowledge Graph Conference learning program.

AUA · CS111 Discrete Mathematics

`2022`

Bachelor-level Discrete Mathematics course at the American University of Armenia.

Hobbies

Barnaul College of Music · Voice and Opera

`Sep 2018 – Oct 2019`

Retrocomputing

Tinkering with older hardware.

webgmc

Static WebSerial app for GQ GMC-800 dosimeters.
